
JONATHAN IBIE

Junior Web Developer | Aspiring Backend & Full-Stack
Developer | PHP, Laravel, MySQL Enthusiast

337b Borno Way
Yaba, Lagos
(234) 70 860 640 96
jojoibie25@gmail.com

Motivated junior web developer with hands-on experience building responsive, production-ready websites and a growing focus on backend development. Currently strengthening skills in PHP, Laravel, MySQL, and relational databases, with practical exposure to authentication, version control, and frontend-backend integration. Curious, fast-learning, and eager to grow within a collaborative team environment while contributing to real-world projects and continuously expanding technical depth.

SKILLS

- **Web Development:** HTML, CSS, JavaScript
- **Backend Exposure:** PHP, Laravel, MySQL, relational databases, authentication
- **Version Control & Collaboration:** Git, GitHub, Bitbucket
- **Design & UI:** Responsive design, component-based UI tools
- **Programming & Tools:** Python (fundamentals)
- **Certifications:** Intellectual Property – WIPO; Operating System Basics – Cisco
- **Additional Skills:** Graphics design, task tracking, file organization

EXPERIENCE

ALTOKOM, remote — *SIWES Intern*

January 2025 - July 2025

Gained hands-on experience in web development and version control using Git, Tailwind css, Laravel, Flux UI, DaisyUI, MaryUI

ALTOKOM, remote — *Junior Front-end Web Developer*

July 2025 - present

I develop and maintain front-end code for ongoing company projects. I also implement responsive interfaces using modern UI frameworks. Collaborating with designers and backend developers to ensure seamless integration. Supporting bug fixes, code reviews, and version control processes.

EDUCATION

Miva Open University , Nigeria— *B.Sc in Software Engineering*

January 2024 - still ongoing

Currently pursuing a degree with a focus on software development, data structures, and algorithms. Actively building skills in web development and version control through projects and coursework.

International European University , Ukraine — *MBBS*

November 2021 - April 2024

I took a deferment due to the war, which disrupted my studies and required me to continue virtually. However, I later suspended my studies as I was unable to continue effectively in a virtual learning environment.

Projects

Romero Fashion Closet (Personal project)

Designed and developed a modern fashion website layout as a personal practice project. I implemented responsive pages to ensure compatibility across mobile and desktop devices. Practiced front-end functionality, styling, and UI/UX layout structure to improve design and development skills.

GoGive Time (Company project) - *still ongoing*

Designed and developed core pages for a live production website using responsive design principles and modern component-based UI tools; supported backend functionality through database relationship modeling, basic server-side logic, and integration of frontend components with backend data.

FHSA (Company project)

Supported front-end development using Tailwind CSS and UI libraries. Assisted with integration tasks and interface consistency.

Multus-Competentia (Company project) - *still ongoing*

Contributed to the successful launch of a company website by designing and implementing responsive, user-focused front-end interfaces, translating design concepts into production-ready web pages.
